

Pasture Chain Harrow – Assembly Instructions

1. Lay Down All Sections of Chain Harrow Wide Open with Tines Touching the Ground.
2. **Length Wise Setting:** There are Drawbar Pull Hooks on front and Back end of the harrow sections. Engage drawbar on front or back depending on aggressiveness of harrowing you may need with pull hooks and hitch behind your tractor, and it is good to go.

3. **Width wise setting for harrows having more than one section:** There are S-Hooks on one side of each Section to engage multiple chain harrow sections width wise.

Bring each set of sections as per step 2 parallel to each other and check width wise all sections next to each other are on the same mode / pattern.

Width wise engage S-Hooks of one section to the next section and lock the s-hooks with a hammer. These can be more than two sections. e.g. In 18 ft. wide Chain Harrow, width wise there are three 6ft. wide sections 6+6+6

4. Now Chain Harrow sections are ready to pull either side. Engage drawbar with pull hooks and hitch behind your tractor and go.
